DETAILED ACTION

This office action is in response to the RCE filed 2/23/2006. Applicant is thanked for the interview of 2/14/2006 where it was discussed that the claim language in the case could still be read upon by the prior art of record. The amendments made to the claim language are noted below to more clearly claim the current invention and are deemed allowable.

Allowable Subject Matter

1. Claims 1-13 are allowed.
2. The following is an examiner's statement of reasons for allowance:
3. While U.S. Patent No. 6,272,401 to Boger shows a method of performing online valve diagnostics using the claim language set forth by applicant, neither this reference taken alone or in combination with the prior art of record disclose that these diagnostics are performed at the same time as the valve operates in a plant process. The Boger patent only shows a special diagnostic mode of operation. It is this execution during a plant process, in combination with the remaining elements and features of the invention, that the applicant's invention defines over the prior art of record.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
